CHESHIRE WEST AND CHESTER CARDIO-RESPIRATORY SYMPOSIUM

WINTER PRESSURES & ADMISSIONS AVOIDANCE

**TUESDAY 5TH
NOVEMBER
2024**

***12.30PM-4.30PM**

**Cheshire View
Plough Lane
Christleton
CH3 7PT**

Event Aims..

Building on the success of the CVD Prevention symposium in July and with a focus on early intervention and prevention at this second in a series of thematic events, you will hear from leading experts on evidence-based approaches that can help reduce demands on primary care and the wider system and shape our future approach to cardio-respiratory health.

The event is underpinned by a commitment to do more across the system to reduce health inequalities; improve patient outcomes; reduce preventable primary care interactions and potential admissions through the winter period and beyond.

During the Event, you will have the opportunity to..

- Hear about the latest developments to improve outcomes for your patients with cardio-respiratory conditions
- Build on existing connections and create new ones
- Share your experiences with peers across cardio-respiratory care
- Network with sponsors showcasing the latest products and services
- Engage in lively outcome-focussed discussions with key takeaways to apply in practice

By the end of the Event, you will have..

- Considered current evidence and the extent of the challenge!
- Explored ways to achieve patient, public and system benefits including better diagnostics and early interventions
- Considered gaps, challenges and potential solutions
- Identified a set of priority actions with commitment from all to drive these forward!

Are you up for this Challenge?!
